The company **Aquasanita** is one of the most well-known manufacturers of kitchen equipment on the market. They export over 80% of their products to more than 30 countries worldwide. Aquasanita sinks and faucets meet the most demanding requirements for processing and quality of construction.

The new **attractive Hera 2473 kitchen faucets** in gold and copper are a novelty on the market. The sink faucet fits perfectly into a rustic, retro, or Provence-style kitchen. It looks great on a spacious ceramic or granite sink. It is predestined for it by the polished brass surface, which adds charm to the entire washing center.

The Hera 2473 kitchen faucet is taller, making it easy to wash larger pieces of dishes, such as baking pans or pots. You will also appreciate the height of the faucet when filling water, for example, into a kettle for tea.

The body of the battery is made of durable brass. **High-quality copper and gold construction** gives the battery significant durability. As part of maintenance, it is sufficient to simply wipe the battery with a damp cloth.

The battery is equipped with a NEOPERL aerator and a branded ceramic cartridge KEROX 40 mm. The spout is rotatable by 360 degrees.
