518,30 € bez DPH

Luxurious ceramic single bowl sink Chambord Francois 596 is manufactured by the prestigious German company Villeroy & Boch. This sink is perfect for a rustic kitchen and also stands out in a modern kitchen. Ceramic modular sinks have been gaining increasing popularity lately.

The ceramic modular sink represents a combination of elegance and functionality. The Francois 596 sink brings a charming and **luxurious appearance** to your kitchen. Its smooth surface finish and beautiful white color add a sophisticated touch to your kitchen.

The Chambord Francois 596 sink will catch your eye at first glance with its original appearance. The sink features a **visible front side** with an extended rear edge. You will especially appreciate the raised rear edge of the sink when washing dishes. The water will flow straight into the sink bowl. Another great advantage is the placement of the faucet in the sink.

Chambord ceramic sinks are distinguished by their luxurious design and high quality craftsmanship. The main **advantages of ceramics** include high resistance to impact, scratch resistance, high temperature resistance, hygienic safety, and color stability. Dirt and dyes do not adhere to the surface. Ceramic sinks require very little maintenance. If you are looking for a white sink, choose ceramics.

Modular sinks are making a comeback in the world of kitchens, just like rustic style. A modular sink is installed directly onto a cabinet. The installation of the sink is mainly recommended for non-absorbent material countertops. In the case of a stone countertop, the sink is installed underneath it, while in the case of a wooden countertop, we recommend the sink slightly protruding above the countertop to prevent contact with water.

**Key features of the CHAMBORD FRANCOIS 596 kitchen sink**

- White ceramic sink.
- Francois 596 has an extended warranty for 5 years.
- optimal choice for so-called rustic kitchens
- practical size and depth (17.7 cm) of the bathtub
- craftsmanship supported by 270 years of ceramic experience
- Ceramic sinks are exceptionally resistant to high temperatures, impact, and scratching
- suitable for a cabinet of 60 cm

*A ceramic sink is fired in kilns and the glaze is applied by hand, making each piece unique. It is necessary to take into account a tolerance of +/- 1-1.5 cm in dimensions. We recommend having the sink physically available for the realization of the kitchen counter.*

### **Parts of the packaging:**

- Sifon
- Release.
- Robbery
