Spacious elegant granite sink with a drip tray Deante Eridan 860.0E, manufactured by the prestigious company Deante. The company is among the top players in the market for the production of granite, stainless steel, and ceramic sinks. They have been active on the market for more than 30 years, representing a guarantee of quality. Deante brand products are called ProEco, which means that natural materials and eco-friendly packaging are used in their production.

Eridan 860.0E sink represents a unique combination of minimalist design and functionality. With its optimal dimensions, spacious draining area, and modern design, this sink fits perfectly into almost any kitchen. The sink showcases lightness and elegance.

With this modern sink, you will maximally utilize the kitchen space. The draining part has the same dimensions as the sink basin. The sink features an extremely spacious and deep chamber, in which you can comfortably wash not only bulky pots and baking sheets, but also, for example, fridge shelves. This sink was designed for demanding users. The faucet hole is located on the draining surface, allowing you to maintain a clean kitchen without frequent wiping of the sink and its surroundings. The sink is also equipped with an eccentric control. The automatic drain closure is a system that allows you to close and open the water drain using a button. An important advantage of this solution is the fact that one movement is enough to immediately unlock the water, without having to immerse your hands.

The advantage of a granite sink is its **color variability** and the possibility to coordinate with the rest of your kitchen, simple maintenance, and attractive appearance. The granite, from which the sink is made, is a material resistant to scratches, color change, and high temperature. The space-saving siphon, which

is part of the set, has a special design that occupies very little space.

Key features of the DEANTE ERIDAN 860.0E kitchen sink
