Timeless granite sink with a drainer **Deante Zorba 760.0E** made by Deante company, which is a leader in the market of granite, stainless steel, and ceramic sinks. Deante has been on the market for over 30 years, representing a guarantee of quality. Deante brand products are called ProEco, which means that natural materials and Eco packaging are used in their production.

With its **timeless simple appearance**, the Deante Zorba 760.0E sink is an ideal choice for almost any kitchen in any style. The sink presents itself with lightness and elegance. The model of the granite sink with a drainer is the most common choice for customers in kitchen setups.

The granite single bowl sink Deante Zorba 760.0E features a **large and practical drainer**. The 15 cm deep basin provides enough space for comfortable washing of even large pots and pans. The faucet hole is located on the drainer surface, allowing you to maintain a clean kitchen without frequent wiping of the sink and its surroundings. The sink is also equipped with a eccentric control. The automatic drainage closure is a system that allows you to close and open the water drain using a button. An important advantage of this solution is the fact that one motion is enough to instantly unlock the water without having to dip your hands.

The advantage of a granite sink is its **color variability** and the possibility to match it with the rest of the kitchen, easy maintenance, and attractive design. Among the main benefits are excellent resistance to impact, scratches, and high temperatures. The sink has hydrophobic properties, which means that its surface not only does not allow water molecules to pass through but also repels them. Therefore, the sink is easy to keep clean.

Key features of the kitchen sink DEANTE ZORBA 760.0E
