Pool & Spa filter. Kompatibilní modely: MSPA filter FD2089

EAN: 8596220012388

7,68 €

6,40 € bez DPH

Donner MSPA filtration cartridge is intended for water filtration in hot tubs and pools. The filter helps remove impurities, dust, and other dirt, ensuring crystal clear water. We recommend regularly cleaning and replacing the filters. This double pack is suitable for all models of inflatable hot tubs from the MSPA series. They are easily attached by simply twisting them onto the filtration nozzle inside the hot tub.

The **filtration cartridge for pools and spas MSPA** is certified and tested by the organization IAPMO according to NSF/ANSI 50. The filter uses lead-free and BPA-free materials.

The MSPA filtration cartridge, designed **for pools and hot tubs**, is made of Trilobal fabric. This increases the filtration area, which retains more impurities without reducing the water flow. Thanks to the innovative Dirt-Locking technology, the fabric captures much more dirt than regular fabric. This filter removes hair, leaves, dust, sediment, sand, etc.

Reinforced end caps are not only resistant to breakage, but also highly resistant to chemicals commonly found in pools and spas. The unique structure of the filter fabric makes it easy to capture a large volume of impurities. The filter can be easily washed and cleaned. After cleaning, the filter is like new again and ready for the next use.

Key features of the DONNER MSPA CARTRIDGE FILTER

- certified NSF/ANSI 50
- filtration efficiency up to 95%
- executive filtration performance

- end cover with high resistance to chlorine
- long lifespan
- easy cleaning
