30,12 €

25,10 € bez DPH

A new product on the market is the **year-round PRB50-IN filtration cartridge designed for pools, hot tubs, and SPAs**. High-quality filtration technology that ensures crystal clear water throughout the season. The PRB50-IN filter has a lifespan of 6 months.

The **PRB50-IN Spa Filter** is tested and certified by IAPMO according to NSF/ANSI 50. The filter is made from materials free of lead and BPA.

The PRB50-IN filtration cartridge, designed **for pools and spas**, is made of Trilobal fabric. With an increased filtration area, it captures more impurities without reducing the flow. Thanks to the innovative Dirt-Locking technology, the fabric captures much more impurities than regular fabric. This filter removes hair, leaves, dust, sediment, sand, etc.

Reinforced end caps are not only resistant to breakage, but also highly resistant to chemicals commonly found in pools and spas. The unique structure of the filter fabric makes it easy to capture a large volume of impurities. The filter can be easily washed and cleaned. After cleaning, the filter is like new again and ready for the next use.

Cleaning the DONNER PRB50IN filter

On average, we recommend cleaning the filter with running water once every two weeks. To remove larger impurities such as grease, etc., you can use a non-foaming cleaning agent. After cleaning, we recommend allowing the filter to dry. For this reason, it is a very practical investment to have two filters and alternate them. This will ensure continuous cleaning.

Key features of the CARTRIDGE FILTER DONNER PRB50IN

- certified NSF/ANSI 50
- filtration efficiency up to 95%
- executive filtration performance
- end cover with high resistance to chlorine
