The **Granisil** brand represents a mark of high quality and luxurious design. Granisil sinks contain over 80% granite and quartz. Thanks to the presence of natural stone, it is a very hard material. Granisil is completely safe for contact with food. The Granisil Bairo 565.5 sink is manufactured in the EU. The smooth surface of the sink beautifully complements every kitchen decor and style.

Kitchen sink Bairo 565.5 is specific with its short and shaped drainer with practical grooves that facilitate water drainage. The surface is intended for drying dishes. Perfectly rounded edges of the sink make overall care and cleaning easier. The sink is predestined for smaller kitchens due to its dimensions.

It is possible to drill holes for the installation of a kitchen faucet or for a recessed soap dispenser into the sink upon request. The Bairo 565.5 sink features a **hidden overflow** inside the sink basin, as shown in the photograph. The overflow protects the sink from overflowing.

The package of the sink includes a **space-saving siphon** made by an Italian manufacturer. A siphon that saves space in the cabinet under the sink. You can place, for example, a separate waste bin under the sink. The included siphon can be connected to a dishwasher or washing machine. Easy installation of the sink. The sink is designed for a cabinet of 45 cm.

Sinks of the Granisil brand are manufactured using innovative **NANO Granite technology**. The products are highly resistant to high temperatures, impacts, thermal shocks, scratches, and stains. Granisil sinks are made from the highest quality mixture of granite aggregate (80%) and resin (20%).

Key features of the GRANISIL BAIRO 565.5 kitchen sink

- granite sink in black metallic color with a short overflow
- Bairo 565.5 has an extended 10-year warranty.
- The sink is designed for smaller kitchens in terms of its dimensions.

- sufficiently deep 18cm sink basin
- The sink is intended for top mounting.
- suitable for a cabinet of 45 cm
- made using innovative NANO Granite technology
- from the highest quality mixture of granite aggregate and resin

How to keep the sink always like new?... Regular care is sufficient. Cleaning is not difficult at all, a damp soft sponge for dishes and a little common dish soap will do. Wash the sink with circular motions, especially carefully around the faucet and drain. Then rinse with clean water and dry.
