

Spring Source RWF4700A

Vysoce kvalitní filtr, který zlepšuje chuť a kvalitu vody.

EAN: 8596220012937

14,40 €

12,00 € bez DPH

The replacement water filter for refrigerators **Spring Source RWF4700A** is compatible with **LG LT1000P (ADQ747935)** brand fridges, which have the filter located inside the refrigerator door.

The Spring Source RWF4700A water filter is designed for refrigerators that have a source of drinking water and an ice maker.

The filters are certified by NSF/ANSI 42 & 372 Lead-free from NSF and IAPMO, European Food Grade Regulations EC-1935/2016, ROHS, REACH, BPA free, TUV, and the Australian watermark.

The Spring Source RWF4700A **water filter removes unwanted substances from water**, such as chlorine (up to 99%), THMs, VOCs, and other impurities. This significantly improves the taste of drinking water, while preserving the beneficial minerals for the human body. The filter is made without BPA and is made from advanced coconut shell carbon. The outer layer is 0.5 microns, ensuring better filtration. The filters are tested by an independent laboratory.

We recommend **changing the filter approximately every six months**. If you don't replace the filter on time, it will lose its filtration abilities. This means that you and your family might consume harmful bacteria, impurities, chemicals, and unwanted particles. Therefore, this carbon filter is an ideal solution

for clean and safe drinking water.

Key features of Spring Source RWF4700A water filter

- certified NSF/ANSI 42 & 372 Lead-free by NSF and IAPMO
- high-quality lead-free filter cartridge
- it effectively removes impurities, odors, heavy metals, bacteria, and chlorine
- improves the taste and quality of drinking water
